## **DETAILED ACTION**

### **Terminal Disclaimer**

1. The terminal disclaimer filed on 4/25/2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of patent no. 6,701,063 has been reviewed and is accepted.

The terminal disclaimer has been recorded.

### **Examiners Amendment**

2. Claim 29 has been cancelled per phone authorization from attorney Al Shiavelli on July 8, 2008.

### ***Allowable Subject Matter***

3. Claims 13 – 28 (renumbered 1 – 16) are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

The present invention of claims 13 – 28 is directed to a method and apparatus for recording and/or reproducing image data in which a first video file managed by a first directory having a DVD standard and a second video file which has High-resolution are recorded on optical disc. This makes it possible to store video data by a different

compression method on the standard DVD disc as well as standard DVD video data.

Independent claims 13 identifies the unique distinct feature “recording data files which are related to ones of the video data files, and recording video managing information to relate ones of the video data files to ones of the data files during a reproduction of the video data files which comply with the first predetermined standard.”

The closest prior art Koyama et al (US 6,424,385) discloses a method for recording and/or reproducing image data (fig 1) the method comprising: recording video data files which comply with a first predetermined standard (col 17, lines 26 – 39, low resolution image data), recording a first directory for managing the video data files, and which complies with the first predetermined standard (U-TOC disclosed in col 21, lines 36 – 57 and the management disclosed in the abstract), recording a second directory for managing the data files (col 16, lines 34 – 56, high resolution image data) (management data table disclosed in the abstract)

Koyama et al however does not disclose or fairly suggest recording data files which are related to ones of the video data files, and which comply with a second predetermined standard which is different from the first predetermined standard a method of recording and reproducing digitally compressed and recording video managing information to relate ones of the video data files to ones of the data files during a reproduction of the video data files which comply with the first predetermined standard.

Hence claim 13 is allowed.

Since claims 14 – 20 depend on claim 13, therefore they are also allowed.

Therefore claims 13 - 20 are allowed over prior art.

Independent claim 21 identifies the unique distinct feature "a second recording section to record data files which are related to ones of the video data files, and a video management section to record video managing information to relate ones of the video data files to ones of the data files during a reproduction of the video data files which comply with the first predetermined standard."

Hence claim 21 is allowed.

Since claims 22 to 28 depend on claim 21, therefore they are also allowed.

Therefore claims 21 - 28 are allowed over prior art.
